

Abstract

A method for applying individualized rendering parameters a single page basis to enable rendering of image data associated with a job having a plurality of pages includes: assigning a first set of color processing options to a first group  
5 of pages in the job; assigning a second set of color processing options to a second group of pages in the job, the second set of color processing options identifying a color space transformation profile; receiving a page of image data to be rendered; selecting a color space transformation profile for the received page of image data based on the second set of color processing options; and applying  
10 the selected color space transformation profile to render the page of image data.
